

Timing

Vopak expands its operations in 2 phases.

The first phase

Starting the construction of the new Vopak terminal, with a capacity of some 100,000 cbm of storage capacity. This phase involves an investment of around EUR 70 million and will be operational in 2007.

The second phase

This phase is planned to raise the total capacity of the terminal to some 300,000 cbm divided over 180 tanks. The timing is dependent on future development of the bulk liquids markets, as well as on the development of the Antwerp left bank.

Vopak

A global network

Vopak

Vopak
Terminal Leftbank
Antwerp

To meet the growing demand for storage, Vopak is investing in a new full service concept terminal on the left bank of the river Scheldt in the port of Antwerp, Belgium. By building this new chemical terminal, Vopak strengthens its position in the ARA (Amsterdam-Rotterdam-Antwerp) area.

In this area, Vopak currently operates three chemicals terminals in Antwerp and three in Rotterdam. The new terminal on the Antwerp left bank will allow Vopak to continue the ongoing process of terminal specialisation in terms of product and modes of transport in this area.

State-of-the-art terminal

To anticipate on future requirements from its customers, the left bank terminal will be ultra modern, not only in terms of infrastructure, but also in layout and design. A high percentage of the tanks and lines will be fully stainless steel. The terminal will have two berths for ocean-going vessels and two for barges and coasters. With fully automated truck and railcar loading gantries, substantial stainless steel capacity with dedicated pipelines from and to jetties and loading gantries, drumming and warehousing services, this terminal will become the state-of-the-art logistics hub.

Flexible solutions

The new Vopak Chemical Terminals Benelux terminal in Antwerp will have:

- ✓ 300,000 m³ of chemical storage capacity, divided over 180 tanks in sizes ranging between 1,000 m³ and 2,500 m³
- ✓ two berths for ocean-going vessels
- ✓ two for barges and coasters
- ✓ state-of-the-art infrastructure including stainless steel lines and tanks
- ✓ highly automated operations
- ✓ automatic order processing by using internet and ERP to ERP technology
